Sommario/riassunto

This book analyses the processes, mutations and trends currently characterising the world of work that are bound up within the deep contradictions of a global capitalist system troubled by systemic crisis, where the old Fordist and Keynesian state order has been substituted by a minimal, pro-business neoliberal State founded on the intensive restructuring of economic and productive systems and work organisation, characterised by labour deregulation, flexibility, super-exploitation and social precariousness. This is a work that illustrates the paradigmatic transition from social and labour relations based on job security, comprehensive collective agreements and guaranteed social rights, towards new social relations that find their technical, political and organizational roots in job insecurity, work rotation and monumental social insecurity, generally expressed in the systemic and growing loss of social and labour rights by workers the world over. First published in Spanish by the Facultad de Ciencias Políticas y Sociales de la UNAM and Editorial Miguel Ángel de Porrúa as Los rumbos del trabajo. Superexplotación y precariedad social en el siglo XXI , Mexico, 2012.
