

1. Record Nr.	UNINA9910270907603321
Autore	Fati Suliman
Titolo	IPTV delivery networks : next generation architectures for live and video-on-demand services // edited by Suliman Mohamed Fati, Faculty of Information Technology and Science, INTI International University, Persiaran Perdana BBN, Putra Nilai, Negeri Sembilan 71800, Malaysia, Saiful Azad, Senior Lecturer, Faculty of Computer Systems & Software Engineering, University Malaysia Pahang, Lebuhraya Tun Razak, 26300 Gambang, Kuantan, Pahang, Malaysia, Al-Sakib Khan Pathan, Associate Professor, CSE Department, Southeast University, A.R. Tower, 24, Kemal Ataturk Avenue, Banani, Dhaka-1213, Bangladesh
Pubbl/distr/stampa	Hoboken, New Jersey, USA : , : Wiley, , 2018 [Piscataway, New Jersey] : , : IEEE Xplore, , [2018]
ISBN	1-119-39790-1 1-119-39789-8 1-119-39793-6
Edizione	[First edition.]
Descrizione fisica	1 online resource (391 pages)
Disciplina	621.38800285/4678
Soggetti	Internet television Multimedia communications Computer network architectures
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	List of Contributors xvii -- Editor Biographies xxi -- Preface xxiii -- Acknowledgement xxvii -- Part I IPTV Delivery Networks Fundamentals 1 -- 1 IPTV: Delivering TV Services over IP Networks 3 /Suliman Mohamed Fati and Putra Sumari -- 1.1 Overview 3 -- 1.2 Internet Protocol Television 4 -- 1.3 Evolution of TV to IPTV 6 -- 1.3.1 IPTV Services 7 -- 1.3.2 IPTV Standardisation 8 -- 1.3.3 General Architecture of IPTV 9 -- 1.4 IPTV Delivery Network 10 -- 1.5 Evolution of the Delivery Network 11 -- 1.5.1 IPTV Delivery Network Characteristics and Challenges 15 -- 1.6 The Key Issues of IPTV Delivery Networks 17 -- 1.7 Conclusion 18 -- References 19 -- 2 IPTV Streaming Classification 25 /Miguel Masciopinto, Pedro Comesas

a, and Fernando Pérez-González	25
-- 2.2 Framework	29
-- 2.2.1 IPTV Description	30
-- 2.2.2 IPTV Bitrate Footprint	32
-- 2.3 Classification Scheme	33
-- 2.3.1 SVM Classifier	36
-- 2.4 Experimental Setup	36
-- 2.4.1 Database Construction	37
-- 2.4.2 Training/Test Set-Partitioning	38
-- 2.4.3 Classification Performance Measures	41
-- 2.5 Experimental Results	44
-- 2.5.1 TSS vs. OFS Classification	45
-- 2.5.2 TSS Ternary (DVD vs. DVB-S vs. DVB-T) Classification	47
-- 2.5.3 TSS Binary (DVB-S vs. DVB-T) Classification	50
-- 2.5.4 OFS Binary (DVB-S vs. DVB-T) Classification	53
-- 2.5.5 Relevance of the Used Statistics	55
-- 2.6 Conclusions	59

 Technologies and Architectures for Future IP Television Services 315
 /Lucile Sassatelli and Marie-Josète Montpetit -- 12.1 Introduction
 315.
 12.2 The Evolution of Users' Experience: Usage, Expectations
 and Reluctances 316 -- 12.2.1 Broadcast Versus OTT: Towards a
 Spurious Opposition 316 -- 12.2.2 The Multi-Screen Multi-Device
 Anywhere Experience 317 -- 12.2.3 Business Experiences and
 Inevitable Evolution for the Stakeholders 319 -- 12.3 Architectural
 Evolution of IPTV: Towards a Smart Meld with OTT 320 -- 12.3.1 The
 Main Overhauls of IPTV: HTML5, Cloudification, Software-Defined Video
 320 -- 12.3.2 Legacy IPTV Extending its Reach by Inspiring OTT
 Evolution: Multicast, Caching, Peer-to-Peer (P2P) 323 -- 12.3.3
 Coordinating the OTT delivery entities to enforce IPTV-like quality of
 experience: Collaboration between ISPs, CDNs and CPs 329 -- 12.4
 Technical focus 331 -- 12.4.1 P2P assistance to CDNs, caching and ICN
 332 -- 12.4.2 The Wireless Video Challenge: In-Home WiFi and
 Offloading of Cellular Networks 335 -- 12.4.3 VR: The greatest
 technological challenge ahead? 337 -- References 338 -- Contributor
 Biographies 345 -- Index 357.

Sommario/riassunto

A GUIDE TO THE CURRENT TECHNOLOGIES RELATED TO THE DELIVERY
 PROCESS FOR BOTH LIVE AND ON-DEMAND SERVICES WITHIN IPTV
 DELIVERY NETWORKS IPTV Delivery Networks is an important resource
 that offers an in-depth discussion to the IPTV "Internet Protocol
 Television" delivery networks for both live and on-demand IPTV
 services. This important book also includes a review of the issues and
 challenges surrounding the delivery of IPTV over various emerging
 networking and communications technologies. The authors' an
 international team of experts introduce a framework for delivery
 network applicable for live and video-on-demand services. They review
 the fundamental issues of IPTV delivery networks and explore the QoS
 "Quality of Service" issue for IPTV delivery networks that highlights the
 questions of security and anomaly detection as related to quality. IPTV

Delivery Networks also contains a discussion of the mobility issues and next-generation delivery networks. This guide captures the latest available and usable technologies in the field and: . Explores the technologies related to delivery process for both live "real time" and on-demand services in highly accessible terms. Includes information on the history, current state and future of IPTV delivery. Reviews all the aspects of delivery networks including storage management, resource allocation, broadcasting, video compression, QoS and QoE. Contains information on current applications including Netflix "video-on-demand", BBC iPlayer "time-shifted IPTV" and live "real time" streaming. Written for both researchers and industrial experts in the field of IPTV delivery networks, this is a groundbreaking book that includes the most current information available on live and on-demand IPTV services.
