Record Nr.	UNINA9910270926203321
Autore	Kersting Gotz
Titolo	Discrete time branching processes in random environment . Volume 1 / / / Gotz Kersting, Vladimir Vatutin
Pubbl/distr/stampa	London, England ; ; Hoboken, New Jersey : , : ISTE : , : Wiley, , 2017 ©2017
ISBN	1-119-47377-2
	1-119-47355-1
	1-119-45289-9
Edizione	[1st edition]
Descrizione fisica	1 online resource (1 volume) : illustrations
Collana	Mathematics and Statistics Series
	THEi Wiley ebooks
Dissipling	F10.004
	519.234
Soggetti	Branching processes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Branching processes are stochastic processes which represent the reproduction of particles, such as individuals within a population, and thereby model demographic stochasticity. In branching processes in random environment (BPREs), additional environmental stochasticity is incorporated, meaning that the conditions of reproduction may vary in a random fashion from one generation to the next. This book offers an introduction to the basics of BPREs and then presents the cases of critical and subcritical processes in detail, the latter dividing into weakly, intermediate, and strongly subcritical regimes.
