

1. Record Nr.	UNINA9910271024703321
Autore	Valls Robert
Titolo	Inorganic chemistry : from periodic classification to crystals / / Robert Valls
Pubbl/distr/stampa	London, England ; ; Hoboken, New Jersey : , : ISTE Ltd : , : John Wiley & Sons, Inc., , 2017
ISBN	1-119-46892-2 1-119-46893-0 1-119-46895-7
Descrizione fisica	1 online resource (261 pages)
Disciplina	546.05
Soggetti	Chemistry, Inorganic
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1. Knowledge of the Periodic Table -- Chapter 2. Knowledge of Metallic Crystals -- Chapter 3. Knowledge of Ionic Crystals.
Sommario/riassunto	Using classification, diagrams and crystallography elements, we describe in this book the bonds in the crystals using the basic patterns. The use of various criteria such as ionicity character of the bonds, the use of hard sphere models, the Pauling rules and the spatial availability of ions all together make it possible to better understand the spatial organization of typical crystals. Through original representations, the structure and the nature of the bonds in binary crystals of MX- and MX ₂ - types as well as the ternary crystals of the perovskite and spinel type are studied.
