Africa-Europe collaborations for climate change research and innovation: What difference have they made? -- Chapter 6. Equality in health research cooperation between Africa and Europe – the potential of the Research Fairness Initiative -- PART 3. FUTURES OF AFRICA-EUROPE RESEARCH AND INNOVATION COOPERATION -- Chapter 7 Towards better joint work: Reflections on partnership effectiveness.

Sommario/riassunto

This edited volume is concerned with the evolution and achievements of cooperation in research and innovation between Africa and Europe, and points to the need for more diversified funding and finance mechanisms, and for novel models of collaboration to attract new actors and innovative ideas. It reflects on the political, economic, diplomatic and scientific rationale for cooperation, while also examining practical developments, illustrated with examples, in the fields of food security, health, and climate change. The need to mobilise scientific knowledge and to ensure equality and fairness in the cooperation are recurrent themes. Africa-Europe Cooperation in Research and Innovation is essential reading for policy makers and researchers in international relations and science diplomacy.
