Sommario/riassunto

Este libro reconstruye la historia de la instalación de la Estación Experimental del Instituto Nacional de Tecnología Agropecuaria en San Carlos de Bariloche, desde la hipótesis de que se trató de uno de los modos de establecimiento del Estado nacional en el espacio patagónico. El INTA es analizado como engranaje del paradigma desarrollista y pieza central de la política nacional de ciencia y tecnología para ordenar el territorio y traducir los planes regionales impulsados por el Estado en riqueza económica. Este libro evalúa el impacto de este proceso en los dinamismos productivos, sociales y políticos del territorio.
