Sommario/riassunto

Over the past decade, the greening of industry has become both an issue in scientific and political debate and a generic substantive development in industry itself. This study is the product of an international collaborative research project investigating exemplary cases of successful environmental management in European companies in Denmark, Germany, The Netherlands, Switzerland, Poland, and Latvia with the aim of discovering the reasons and dynamics underlying them and the role environmental policy did and could play. Providing the background and context of the research project, the nine cas
