

1. Record Nr.	UNINA9910280887903321
Titolo	IEEE Std 1901.1-2018 : IEEE Standard for Medium Frequency (less than 12 MHz) Power Line Communications for Smart Grid Applications / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	New York, New York : , : IEEE, , 2018
ISBN	1-5044-4820-0
Descrizione fisica	1 online resource (192 pages)
Disciplina	620.28
Soggetti	Radio frequency Electrical engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Physical (PHY) and media access control (MAC) layers of the medium frequency band (less than 12 MHz) broadband power line communication technology for smart grid applications (SGPLC) based on orthogonal frequency division multiplexing (OFDM) are specified in this standard. The necessary security requirements that assure communication privacy and allow use for mission critical and security sensitive services and applications are addressed in this standard. The coexistence with other technologies based on IEEE Std 1901(TM)-2010 also are addressed. The approach that is geared towards achieving an extended communication range with medium speeds in comparison with the existing power line communication technologies operating in similar frequency bands is defined in this standard.
