Sommario/riassunto	Economists generally assume that wage differentials among similar workers will only endure when competition in the capital and/or labor market is restricted. In contrast, Howard Botwinick uses a classical Marxist analysis of real capitalist competition to show that substantial patterns of wage disparity can persist despite high levels of competition. Indeed, the author provocatively argues that competition and technical change often militate against wage equalization. In addition to providing the basis for a more unified analysis of race and gender inequality within labor markets, Botwinick's work has important implications for contemporary union strategies. Going against mainstream proponents of labor-management cooperation, the author calls for militant union organization that can once again take wages

and working conditions out of capitalist competition. This revised edition was originally published under the same title in 1993 by Princeton University Press.

Sommario/riassunto	Issu d'un colloque tenu à Rouen et au Havre, complété et prolongé par d'autres travaux novateurs, ce livre est le premier recueil critique moderne à s'intéresser à l'œuvre du grand écrivain français (1737-1814). Le volume regroupe des études de jeunes chercheurs comme de spécialistes confirmés. On y lira des chapitres portant sur la correspondance active et passive, en grande partie inédite, de Bernardin de Saint-Pierre, sur ses relations personnelles et professionnelles, ses textes, des plus célèbres, comme le Voyage à l'île de France ou Paul et Virginie, à ceux qui sont restés oubliés dans ses papiers, et ses points de contact avec d'autres gens de lettres, de d'Alembert à Casanova ou Chateaubriand. De cet ensemble ressort un portrait plus complet de l'homme et de l'auteur.
