Sommario/riassunto	This collection of essays, arising from the meetings of the SBL's Prophetic Texts and Their Ancient Contexts Group, examines how prophecy has been constructed in biblical literature such as the Former Prophets, the Latter Prophets, Chronicles, and Daniel, and even in the Qur'an. Recognizing that these texts do not simply describe the prophetic phenomena but rather depict prophets according to various

conventional categories or their own individual points of view, the essays analyze the way prophecy or prophets are portrayed in these writings to better understand how they were structured by their respective authors. -- Publisher
