	Soggetti	German language - Grammar
	Lingua di pubblicazione	Tedesco
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di bibliografia	Includes bibliographical references and indexes.

This volume contains the complete collection of published and unpublished work on German grammar by Tilman N. Höhle. It consists of two parts. The first part is *Topologische Felder*, a book-length manuscript that was written in 1983 but was never finished nor published. It is a careful examination of the topological properties of German sentences, including a discussion of typological assumptions. The second part assembles all other published and unpublished papers by Höhle on German grammar. All of these papers were highly influential in German linguistics, in theoretical linguistics in general, and in a specific variant of theoretical linguistics, Head-Driven Phrase Structure Grammar. Topics covered are clause structure, constituent order, coordination, (verum) focus, word structure, the relationship between relative pronouns and verbs in V2, extraction, and the foundations of a theory of phonology in constraint-based grammar.
