Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Sommario/riassunto	The authors take a detailed look at the economic competence and financial literacy of young adults, especially of those who start an apprenticeship or who take up their studies at a university. Economic competence and financial literacy are of special interest within this group, because these young people are – mostly for the first time in their lives – responsible for autonomously managing their own financial affairs and deal with economic challenges.
