Sommario/riassunto

The stories in this anthology emerged from interviews with women and young people about their experience of intervention when they were escaping a situation of abuse, neglect and/or sexual exploitation. They come from the research project “Cultural Encounters in Intervention Against Violence (CEINAV)” in four countries – England & Wales, Germany, Portugal and Slovenia. Through support services the women and young people were contacted; they came from a minority or migration background and had travelled through a history of violence and intervention, and were asked to tell who intervened, what had been helpful and what had not.
