Disciplina	331.25729
Soggetti	Temporary employment Temporary employees Gig economy - Health aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	"A response is needed to the numerous issues spurred by the expansion of the gig economy, where flexible patterns of employment prevail in contrast to permanent jobs. In this context of the exponential growth of the digital economy and underlying business models the largest nationwide study of its kind into the impact of the working conditions in the UK music industry 'Can Music Make You Sick?' has been conducted by MusicTank/University of Westminster. Tis research suggests the need to consider the future of work not only from an economic or employment law perspective but from a mental health one too. What are the psychological implications of precarious work and how are factors such as financial instability, the feedback economy and personal relationships reflected in mental health outcomes or connected to the business relationships most musicians and other gig economy participants work under? Authors Sally-Anne Gross, George Musgrave and Laima Janciute consider which policy measures may help or harm gig economy workers including the taxation of self-employed workers, a universal basic income, education around mental health issues and access to mental health support."
