

1. Record Nr.	UNINA9910284954403321
Titolo	Plant adaptation to environmental change : significance of amino acids and their derivatives / / edited by Naser A. Anjum, Sarvajeet S. Gill and Ritu Gill
Pubbl/distr/stampa	Boston, Massachusetts : , : CABI, , [2014] ©2014
ISBN	1-78924-433-1 1-78064-274-1
Descrizione fisica	1 online resource (343 p.)
Disciplina	571.2 581.4
Soggetti	Crops - Effect of stress on Crops - Adaptation Crops - Physiology Amino acids Polyamines
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	part I. Introduction -- part II. Amino acids and peptides, and plant stress adaptation -- part III. Amines and brassinosteroids, and plant stress adaptation -- part IV. Appraisal and perspectives.
Sommario/riassunto	Plants constantly cope with unfavourable ecosystem conditions, which often prevent them reaching their full genetic potential in terms of growth, development and productivity. This book covers plants' responses to these environmental changes, namely, the modulation of amino acids, peptides and amines to combat both biotic and abiotic stress factors. Bringing together the most recent developments, this book is an important resource for researchers and students of crop stress and plant physiology.
