Hike: Exploring a Landscape of Logging, "Camp Ethics," and Patriotism; William James at Chocorua: A Northern Forest Philosopher; A Traverse of the Presidential Range with the Scottish Highlands on My Mind; Living with the Woods: Disturbance Histories in Thoreau and Burroughs; Nature as Commodity; In Awe of the Body: Physical Contact, Indulgence Shopping, and Nature Writing; Claiming Maine: Acquisition and Commodification in Thoreau's *The Maine Woods*; So Much Beauty Locked Up in It: Of Ecocriticism and Axe-MurderContributors, Index

**Sommario/riassunto**

Nearly 30 million acres of the Northern Forest stretch across New York, Vermont, New Hampshire, and Maine. Within this broad area live roughly a million residents whose lives are intimately associated with the forest ecosystem and whose individual stories are closely linked to the region's cultural and environmental history. The fourteen engaging essays in *Nature and Culture in the Northern Forest* effectively explore the relationships among place, work, and community in this complex landscape. Together they serve as a stimulating introduction to the interdisciplinary study of this unique region.

Sommario/riassunto

"Learning Legacies explores the history of cross-cultural teaching approaches, to highlight how women writer-educators used stories about their collaborations to promote community-building. Robbins demonstrates how educators used stories that resisted dominant conventions and expectations about learners to navigate cultural differences. Using case studies of educational initiatives on behalf of African American women, Native American children, and the urban poor, Learning Legacies promotes the importance of knowledge grounded in the histories and cultures of the many racial and ethnic groups that have always comprised America's populace, underscoring the value of rich cultural knowledge in pedagogy by illustrating how creative teachers still draw on these learning legacies today"--
