Sommario/riassunto

Iraq, democracy and Islam are powerful global forces which shape not only many aspects of the lives of Muslims, but the lives of other citizens of the world as well. This book explores many of the challenging questions posed by the interconnections between these three forces, concentrating on issues which have global significance and which have been less studied up until now. It contains contributions from many of the leading thinkers and academics from this subject area, including the former President of Iran, Seyyed Mohammad Khatami. Topics such as the compatibility of Islam and dem

Sommario/riassunto

The transfer of expert knowledge to an unlearned audience is a highly complex process. It is not only dependant on subject-specific requirements, but also on institutional and media requirements. The early modern period proves to be a time of upheaval due to book printing, during which transfer processes can be studied in a special way. The adaptation of scientific knowledge, for example of law, medicine, theology or artes , to the reception conditions of laypersons

requires differentiated communication strategies that link theoretical concepts of the sciences to the requirements of technical expertise and are able to translate scholarship into practice. This volume brings together interdisciplinary contributions from the history of law, historical book studies, general rhetoric and Germanic medieval studies.
