

1. Record Nr.	UNINA9910293142503321
Autore	Hostettler Silvia
Titolo	Technologies for Development [[electronic resource]] : From Innovation to Social Impact // edited by Silvia Hostettler, Samira Najih Besson, Jean-Claude Bolay
Pubbl/distr/stampa	Cham, : Springer Nature, 2018 Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-91068-X
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XXIII, 225 p. 40 illus., 37 illus. in color.)
Disciplina	338.927
Soggetti	Sustainable development Renewable energy resources Environmental engineering Biotechnology Medical policy Sustainable Development Renewable and Green Energy Environmental Engineering/Biotechnology Health Policy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part I: Introduction -- Part II: Humanitarian Technologies -- Part III: Medical Technologies -- Part IV: Renewable Energies -- Part V: Sustainable Habitat -- Part VI: Disaster Risk Reduction.
Sommario/riassunto	This open access book presents 18 case studies that explore current scientific and technological efforts to address global development issues, such as poverty, from a holistic and interdisciplinary point of view, putting actual impacts at the centre of its analysis. It illustrates the use of technologies for development in various fields of research, such as humanitarian action, medical and information and communication technology, disaster risk-reduction technologies, habitat and sustainable access to energy. The authors discuss how

innovative technologies, such as unmanned aerial vehicles for disaster risk reduction, crowdsourcing humanitarian data, online education and ICT-based medical technologies can have significant social impact. The book brings together the best papers of the 2016 International Conference on Technologies for Development at EPFL, Switzerland. The book explores how the gap between innovation in the global South and actual social impact can be bridged. It fosters exchange between engineers, other scientists, practitioners and policy makers active at the interface of innovation and technology and human, social, and economic development.
