

1. Record Nr.	UNINA9910295747403321
Autore	van Maarseveen Martin
Titolo	GIS in Sustainable Urban Planning and Management // edited by Martin van Maarseveen, Javier Martinez, Johannes Flacke
Pubbl/distr/stampa	Leiden, : CRC Press, 2019
ISBN	1-351-37908-9 1-315-14663-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xii, 351 pages) : digital, PDF file(s)
Altri autori (Persone)	MaarseveenMartin van MartinezJavier FlackeJohannes
Disciplina	307.12160285
Soggetti	City planning - Data processing Geographic information systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	GIS is used today to better understand and solve urban problems. This book explores and illustrates the use of geo-information in the planning and management of urban regions. The first part of the book addresses the concept of sustainable urban development, its different frameworks, the many ways of measuring sustainability, and its value in the urban policy arena. The second part discusses how urban planning can shape our cities, examines various spatial configurations of cities, the spread of activities, and the demands placed on different functions to achieve strategic objective. It further focuses on the recognition that urban dwellers are increasingly under threat from natural hazards and climate change.
