

1. Record Nr.	UNINA9910296451503321
Titolo	IEEE Std C57.161-2018 : IEEE Guide for Dielectric Frequency Response Test // Transformers of the IEEE Power and Energy Society
Pubbl/distr/stampa	New York : , : IEEE, , 2018
ISBN	1-5044-5211-9
Descrizione fisica	1 online resource (76 pages)
Disciplina	537.2
Soggetti	Dielectric measurements Frequency response (Dynamics) Moisture - Measurement
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Dielectric Frequency Response (DFR) test methods of liquid immersed transformers are discussed in this guide. The guide includes recommendations for instrumentation, procedures for performing the tests, and techniques for analyzing the data. This guide describes factors affecting the DFR test moisture estimate including winding configuration and measurement set-up, cellulose material type, low molecular weight acids, and background ac/dc noise interference. This guide is applicable to both field and factory applications. The purpose of this guide is to provide the user with information that will assist in performing Dielectric Frequency Response measurements and interpreting the results from these measurements.
