## Sommario/riassunto

For the people of Timor-Leste, independence promised a fundamental transformation from foreign occupation to self-rule, from brutality to respect for basic rights, and from poverty to prosperity. In the eyes of the country's political leaders, revenue from the country's oil and gas reserves is the means by which that transformation could be effected. Over the past decade, they have formulated ambitious plans for state-led development projects and rapid economic growth. Paradoxically, these modernist visions are simultaneously informed by and contradict ideas stemming from custom, religion, accountability and responsibility to future generations. This book explores how the promise of prosperity informs policy and how policy debates shape expectations about the future in one of the world's newest and poorest nation-states.

Sommario/riassunto	<p>Communication in Poultry Grower Relations shows a process used to continuously improve the working relationship between integrators and their growers. A special feature is the "how to" format in which this book details the relationship process so a company and its growers can implement the procedures discussed. The book also provides a comprehensive discussion on the dynamics associated with corporate culture changes. The reader will learn how to manage the resistance associated with each of the five phases of change to successfully implement the improvements in the company-grower</p>
