Soggetti	Child psychology School psychology Child and School Psychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This concise book reviews the various types of neglect in childhood, providing an operational definition that incorporates existing viewpoints. It describes risk factors for neglect to increase awareness for improved identification, prevention, and treatment of this pervasive problem. This is particularly important as neglect is a growing worldwide issue which receives less attention than more florid forms of abuse. The book aims to facilitate conceptualization and treatment of adult clients who have suffered neglect as well as treatment plans for at risk home environments.
