Titolo	Healthcare Facilities in Emerging Countries : The Challenge for India / / edited by Stefano Capolongo, Marco Gola, Andrea Rebecchi
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-72398-7
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XIV, 134 p. 31 illus., 25 illus. in color.)
Collana	PoliMI SpringerBriefs, , 2282-2577
Disciplina	362.10954
Soggetti	Health services administration Energy consumption Health administration Sustainable development Health Care Management Energy Efficiency Health Administration Sustainable Development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Sommario/riassunto	This multidisciplinary book brings together medical, management, and architectural disciplines in order to formulate new approaches to the programming, planning, and design of healthcare facilities that will improve the quality of healthcare systems in rapidly developing countries, respecting local culture. It achieves this aim by drawing upon case studies on healthcare facilities and services that were undertaken in Kolkata, India, where the public healthcare system is meager and most people do not have access to health services. The approaches presented pay appropriate attention to technical aspects and organizational set-up and are designed to achieve an adequate healthcare assistance, greater production efficiency, better use of local professional resources, and careful control of construction. They are also intended to promote educational progress and future

independence in construction and management of the healthcare system. The book will appeal to all with an interest in design and organizational strategies to meet new healthcare challenges in India and other emerging countries.
