

1. Record Nr.	UNINA9910298190303321
Titolo	Network, Smart and Open : Three Keywords for Information Systems Innovation // edited by Rita Lamboglia, Andrea Cardoni, Renata Paola Dameri, Daniela Mancini
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-62636-1
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (297 pages) : illustrations
Collana	Lecture Notes in Information Systems and Organisation, , 2195-4968 ; ; 24
Disciplina	338.00151
Soggetti	Management information systems Computers Public administration Accounting Bookkeeping Organization Planning Management Industrial management Business Information Systems Information Systems and Communication Service Public Administration Accounting/Auditing Innovation/Technology Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Business Information Systems in a Networked, Smart and Open Environment.- Information Systems Implementation and Structural Adaptation in Government-Business Inter-Organization.- Management Control Systems in inter-organizational relationships for environmental sustainability and energy efficiency: Evidence from the cruise port destinations.- The role of Supply Chain Resilience on IT and Cyber

Disruptions.- Virtual Entrepreneurship and e-Residency Adoption -- Stakeholder accountability through the World Wide Web: Insights from Nonprofits -- From smart work to Digital Do-It-Yourself: a research framework for digital-enabled jobs -- Citizens Coproduction, service self-provision and the State 2.0 -- How Digital Transformation is Reshaping the Manufacturing Industry Value Chain: The New Digital Manufacturing Ecosystem Applied to a Case Study from the Food -- Leverage Once, Earn Repeatedly – Capabilities for Creating and Appropriating Value in Cloud Platform Ecosystems -- IS Architecture and Organisation in the Era of MicroServices -- Hosting Mission-Critical Applications on Cloud: Technical Issues and Challenges -- The Impact of XBRL on Financial Statement Structural Comparability -- Government Financial Transparency and XBRL: First Evidence from Italy -- The propensity of being “Openness” of Italian LGAs. A study of possible relationships with financial performance -- Mapping Financial Performances in Italian ICT-related firms via Self Organizing Maps -- The Impact of Business Intelligence Systems on Management Accounting Systems: the Consultants’ Perspective. .

Sommario/riassunto

This book presents a collection of original research papers addressing the relationship between information systems (IS) and innovation. “Open”, “Smart” and “Network” are three keywords that are currently guiding information systems (IS) innovation, enhancing IS potentialities and their ability to support decision-making processes. The book discusses the relevance of these three new concepts in connection with technological and organizational innovations (i.e. cloud, smart technologies and networking), and the role they play in the development of accounting and management information systems. The book’s primary aim is to investigate how these innovations could influence information systems (with a particular focus on accounting and management information systems) by enhancing their information potentialities and improving accounting methodologies, performance measurement systems, data management, information systems architectures, and external and internal reporting. The book is based on a selection of the best papers—original double-blind reviewed contributions—presented at the 2016 Annual Conference of the Italian Chapter of the Association for Information Systems (AIS).
