Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1 Development of China's Logistics Market -- Chapter 2 Logistics Facilities and Technological Development -- Chapter 3 Regional Logistics Market in China -- Chapter 4 Third-party Logistics Development in China -- Chapter 5 Development of Highway Logistics in China -- Chapter 6 Development of Express Logistics in China -- Chapter 7 Development of Multimodal Transport in China -- Chapter 8 Capital Operation in China's Logistics Industry -- Chapter 9 Development of Intelligent Logistics in China -- Chapter 10 Development of Regional Logistics in the Belt and Road.
Sommario/riassunto	This book is the eighth volume in a series entitled "Contemporary Logistics in China," authored by researchers from the Logistics Research Center at Nankai University. In the spirit of the seven preceding annual volumes, this book carries on the ideal of providing a systematic exposition on the logistics development in China for the

English-speaking community at large. Specially, this volume captures China's logistics development at a crucial turning point. This present report consists of ten chapters, organized into three sections. The introductory section, consisting of three chapters, depicts the current development status of the logistics market, the logistics facilities and technology, and the regional logistics market. The second section addresses the logistics characteristics of four rapidly expanding industries in China—the third-party logistics, the highway logistics, the express logistics, and the multimodal transport. The final section, consisting of three chapters, discusses some hot logistics topics in China. Chapter 8 studies the capital operation in China's logistics industry. The next chapter deals with the development of intelligent logistics in China. The last chapter of this section presents the development of regional logistics along the Belt and Road routes. As with the previous volumes, the ultimate aim of this book is to present a timely portrait of the rapid growth of China's logistics market and the status quo of its logistics industry. In so doing, the book offers an in-depth analysis of critical issues involved in the ongoing dynamic and multi-faceted development, and provides a valuable reference resource for interested readers in the academic and professional fields.
