Improving Health Care Organizations through Servant Leadership; Sigrún Gunnarsdóttir, Kasper Edwards and Lotta Dellve.

Sommario/riassunto

Building on the original writings of Robert K. Greenleaf, this edited collection provides new insights into servant leadership theory and broadens the conceptual framework with a developmental perspective on modern organisations. Bringing together a group of active servant leadership researchers and practitioners from around the world, this book applies Greenleaf's original ideas to current challenges within today's businesses. The authors explore theoretical topics such as purposefulness, compassion, personal growth and mindfulness, as well as providing practical models for implementing a servant leadership culture within organisations, with a particular focus on public administration and the health care industry.

Sommario/riassunto	This volume represents the first in a four-volume series, a daring project by CEU Press which presents the most important texts that triggered and shaped the processes of nation-building in the many countries of Central and Southeast Europe. The series brings together scholars from Austria, Albania, Bosnia-Herzegovina, Bulgaria, Croatia, the Czech Republic, Greece, Hungary, the Republic of Macedonia, Poland, Romania, Serbia and Montenegro, Slovakia, Slovenia and Turkey. The editors have created a new interpretative synthesis that challenges the self-centered and "isolationist" historical narratives and educational canons prevalent in the region, in the spirit of of "coming to terms with the past." The main aim of the venture is to confront 'mainstream' and seemingly successful national discourses with each other, thus creating a space for analyzing those narratives of identity which became institutionalized as "national canons." The series will

broaden the field of possible comparisons of the respective national cultures.
