

1. Record Nr.	UNINA9910298323003321
Autore	Armitage Emily G
Titolo	Correlation-based network analysis of cancer metabolism : A new systems biology approach in metabolomics // by Emily G. Armitage, Helen L. Kotze, Kaye J. Williams
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Springer, , 2014
ISBN	1-4939-0615-1
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (67 p.)
Collana	SpringerBriefs in Systems Biology, , 2193-4746
Disciplina	616.994
Soggetti	Systems biology Metabolism Cancer research Systems Biology Metabolomics Cancer Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	An overview of Cancer metabolism -- Cancer hypoxia and the tumour microenvironment as effectors of cancer metabolism -- Metabolic fingerprinting of in vitro cancer cell samples -- Network-based correlation analysis of metabolic fingerprinting data -- Case study: Systems biology of HIF metabolism in cancer -- Case study: Systems biology of chemotherapy resistance in hypoxic cancer -- Index.
Sommario/riassunto	With the rise of systems biology as an approach in biochemistry research, using high throughput techniques such as mass spectrometry to generate metabolic profiles of cancer metabolism is becoming increasingly popular. There are examples of cancer metabolic profiling studies in the academic literature; however they are often only in journals specific to the metabolomics community. This book will be particularly useful for post-graduate students and post-doctoral researchers using this pioneering technique of network-based correlation analysis. The approach can be adapted to the analysis of any large scale metabolic profiling experiment to answer a range of biological questions in a range of species or for a range of diseases.
