

1. Record Nr.	UNINA9910298324503321
Titolo	Interdisciplinary Concepts in Cardiovascular Health : Volume III: Cardiovascular Events // edited by Ichiro Wakabayashi, Klaus Groschner
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-01074-3
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (196 p.)
Disciplina	610 611.01816 613 614.44
Soggetti	Molecular biology Health promotion Metabolism - Disorders Molecular Medicine Health Promotion and Disease Prevention Metabolic Diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Ischemic heart disease -- Stroke -- Heart Failure -- Cardiac arrhythmias -- Pulmonary hypertension -- Peripheral artery disease -- Venous Thromboembolism -- Abdominal aortic aneurism.
Sommario/riassunto	This book provides an introduction to the principles of both cardiovascular epidemiology and molecular pathophysiology; as a unique aspect, it also outlines and discusses the molecular concepts underlying epidemiological observations. This third volume is focused on the most common "cardiovascular events" to provide an overview on pathogenesis and clinical aspects. The book promotes the use of interdisciplinary approaches in the field of preventive medicine based on recent advances in molecular and cellular pathophysiology. The book offers a valuable resource for researchers in basic biomedical fields and clinical scientists alike, as well as guidelines for novel

avenues of research in both basic pathophysiology and cardiovascular therapy and prevention.
