

1. Record Nr.	UNINA990007107310403321
Autore	Elwan, Omaia
Titolo	La Loi applicable à la garantie bancaire à première demande / par Omaia Elwan . The North American free trade agreement : a comparative analysis / by Armand De Mestral
Pubbl/distr/stampa	The Hague : Martinus Nijhoff Publishers, c2000
ISBN	90-411-1486-6
Descrizione fisica	416 p. ; 24 cm
Collana	Recueil des cours [de l']Académie de droit international = = Collected courses of the Hague Academy of International Law ; 275 (eng)
Altri autori (Persone)	De Mestral, Armand
Disciplina	346.074 341.7543
Lingua di pubblicazione	Francese Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910298353003321
Autore	Taylor Milton W
Titolo	Viruses and Man: A History of Interactions / / by Milton W. Taylor
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-07758-9
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (433 p.)
Disciplina	610 616.9041 616.9101 616079
Soggetti	Virology Medical microbiology Immunology Medical Microbiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index at the end of each chapters.
Nota di contenuto	A Short History of Virology -- What is a Virus?- A History of Cell Culture -- Discovery of Bacteriophage -- Beginnings of Molecular Biology -- History of Immunology -- Interferons -- Cancer and Viruses -- Smallpox -- Yellow Fever -- Influenza -- Poliovirus and Other Picornaviruses -- Hepatitis -- Herpes Viruses -- HIV and AIDS -- Phage Therapy and the Future -- Viral Oncolysis or Virotherapy -- Gene Therapy and Viral Vectors -- Vaccine Against Virus Infections -- Emerging Viruses -- Manufacturing Viruses -- Viruses as Biological Weapons.
Sommario/riassunto	Milton Taylor, Indiana University, offers an easy-to-read and fascinating text describing the impact of viruses on human society. The book starts with an analysis of the profound effect that viral epidemics had on world history resulting in demographic upheavals by destroying total populations. It also provides a brief history of virology and immunology. Furthermore, the use of viruses for the treatment of cancer (viral oncolysis or virotherapy) and bacterial diseases (phage

therapy) and as vectors in gene therapy is discussed in detail. Several chapters focus on viral diseases such as smallpox, influenza, polio, hepatitis and their control, as well as on HIV and AIDS and on some emerging viruses with an interesting story attached to their discovery or vaccine development. The book closes with a chapter on biological weapons. It will serve as an invaluable source of information for beginners in the field of virology as well as for experienced virologists, other academics, students, and readers without prior knowledge of virology or molecular biology.
