

1. Record Nr.	UNINA9910298369903321
Titolo	Landslide Science for a Safer Geoenvironment : Volume 3: Targeted Landslides // edited by Kyoji Sassa, Paolo Canuti, Yueping Yin
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-04996-8
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (690 p.)
Disciplina	333.7 551 551.307 624.15
Soggetti	Environment Engineering geology Engineering—Geology Foundations Hydraulics Natural disasters Environment, general Geoengineering, Foundations, Hydraulics Natural Hazards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"The Hyogo Framework for Action 2005- 2015: Building the Resilience of Nations and Communities to Disasters (HFA) , adopted at the 2nd World Conference on Disaster Reduction (WCDR, Kobe, Hyogo, Japan, in January 2005), represents the most comprehensive actionoriented policy guidance in universal understanding of disasters induced by vulnerability to natural hazards and reflects a solid commitment to implementation of an effective disaster reduction agenda."
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	Debris Flows -- Rock-Slope Instability and Failure -- Earthquake-Induced Landslides -- Rain-Induced Landslides -- Landslides in Cultural/Natural Heritage Sites -- Urban Landslides -- Landslides in Cold Regions -- Landslide in Coastal and Submarine Environments -- Natural Dams and Landslides in Reservoirs.

Sommario/riassunto

This volume contains peer-reviewed papers from the Third World Landslide Forum organized by the International Consortium on Landslides (ICL) in June 2014. The complete collection of papers from the Forum is published in three full-color volumes and one mono-color volume. This third full-color volume contains the following:

- Debris flows · Rock-slope instability and failure
- Earthquake-induced landslides · Rain-induced landslides
- Landslides in cultural/natural heritage sites · Urban landslides · Landslides in cold regions · Landslides in coastal and submarine environments · Natural dams and landslides in reservoirs.
