Titolo	Civil Society Organization and Disaster Risk Reduction : The Asian Dilemma // edited by Rajib Shaw, Takako Izumi
Pubbl/distr/stampa	Tokyo : , : Springer Japan : , : Imprint : Springer, , 2014
ISBN	4-431-54877-7
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (296 p.)
Collana	Disaster Risk Reduction, Methods, Approaches and Practices, , 2196-4106
Disciplina	363.346
Soggetti	Natural disasters Social sciences Sustainable development Natural Hazards Methodology of the Social Sciences Sustainable Development Asia
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Nota di contenuto	From the Contents: Overview and introduction of role of Civil Society Organization in Risk Reduction -- Policy and Advocacy: General Issues -- Policy and Advocacy: Experience from launch of national disaster risk reduction platform in Afghanistan and strategic national action plan -- Policy and Advocacy: Specific case of Indonesia -- Knowledge, Education and Training: General Issues.
Sommario/riassunto	Civil society organizations (CSOs) have played important roles over the years in the disaster field. Starting from the traditional approach of response and relief, the emphasis has gradually shifted to disaster risk reduction. From international nongovernmental organizations (NGOs) to national and local NGOs, all stakeholders have recognized the significance of and need for community-based risk reduction. In their different capacities they have endeavored to establish links to the policy options at the local and national levels. There still are many issues that remain untouched by CSOs, however, and local CSOs face special challenges in resources in terms of human, financial, and

technical issues. Drawing examples from Asia, this book is structured on the roles of CSOs according to the Hyogo Framework for Action priority areas: policy making, risk assessment, education and training, underlying risk factors, and response–recovery. The primary target groups for this book are students and researchers in the fields of environment, disaster risk reduction, and climate change studies. The book provides a clear view of the current trends of research in the field and furnishes basic knowledge on these important topics. Another target group comprises practitioners and policy makers, who will be able to apply the knowledge collected here to policy and decision making.
