

1. Record Nr.	UNINA9910298395003321
Autore	Tshewang Ugyen
Titolo	Bionomics in the Dragon Kingdom : Ecology, Economics and Ethics in Bhutan / / by Ugyen Tshewang, Jane Gray Morrison, Michael Charles Tobias
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-94655-2
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (183 pages)
Collana	Fascinating Life Sciences, , 2509-6745
Disciplina	954.98
Soggetti	Conservation biology Ecology Life sciences Nature Environmental law Environmental policy Animal welfare Environmental sciences—Philosophy Conservation Biology/Ecology Popular Life Sciences Popular Science in Nature and Environment Environmental Law/Policy/Ecojustice Animal Welfare/Animal Ethics Environmental Philosophy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Foreword (By an internationally well-known individual) -- Acronyms and Glossary of Bhutanese Terminology -- Introduction -- 1. Environment Matters: Himalayan Happiness -- 2. National Parks & Protected Areas -- 3. Bhutanese Bio-Culturalism & Sustainability -- 4. The Anthropocene in Bhutan -- 5. Water Towers and Mountains in the Dragon Kingdom -- 6. Pragmatic Conscience: Ecological Governance in the Last Shangri-la -- Coda -- Index.

Sommario/riassunto

This compact and elegant work provides a readily accessible and highly readable overview of Bhutan's unique opportunities and challenges; all her prominent environmental legislation, regulatory statutes, ecological customs and practices, both in historic and contemporary terms. At the same time, *Bionomics in the Dragon Kingdom* places the ecological context, including a section on animal rights in Bhutan, within the nation's Buddhist spiritual and ethical setting. Historic contextualization accents the book's rich accounting of every national park and scientific reserve, as well as providing up-to-the-minute climate-change related hurdles for the country. Merging interdisciplinary sciences, engineering and humanities data in a compelling up-to-date portrait of the country, the authors have presented this dramatic compendium against the backdrop of an urgent, global ecological time-frame. It thus becomes clear that the articulated stakes for Bhutan, like her neighboring Himalayan and Indian sub-continental countries (China, India, Bangladesh and Myanmar), are immense as the Anthropocene epoch unfolds, affecting every living being across the planet. Because Bhutan's two most rewarding revenue streams derive from the sale of hydroelectric power and from tourism, the complexities of modern pressures facing a nation that prides herself on maintaining traditional customs in what has been a uniquely isolated nation are critical.
