

1. Record Nr.	UNINA9910298469103321
Titolo	Advances in Crowdsourcing // edited by Fernando J. Garrigos-Simon, Ignacio Gil-Pechuán, Sofía Estelles-Miguel
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-18341-9
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (183 p.)
Disciplina	330 650 658421 658514
Soggetti	Management Industrial management Entrepreneurship Information technology Business—Data processing Innovation/Technology Management IT in Business
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Foreword -- Chapter 1 From Crowdsourcing to Use of Masscapital -- Chapter 2 Recruiting Individuals to a Crowdsourcing Community -- Chapter 3 Crowdsourcing Fundamentals -- Chapter 4 Crowdsourcing and the Evolution of a Business Ecosystem -- Chapter 5 From Leakage to Crowdsourcing -- Chapter 6 Crowdsourcing: A New Way to Citizen Empowerment -- Chapter 7 Crowdsourcing in Higher Education -- Chapter 8 Crowdsourcing with University Students -- Chapter 9 Humanizing Internal Crowdsourcing Best Practices -- Chapter 10 Using Crowdsourcing to Overcome Barriers to Women Entrepreneurship -- Chapter 11 Gamification for Crowdsourcing Marketing Practices -- Chapter 12 Crowdsourcing: An Application for Promotional Marketing -- Chapter 13 Advances in Crowdsourcing: Surveys, Social Media and

Geospatial Analysis.

Sommario/riassunto

This book attempts to link some of the recent advances in crowdsourcing with advances in innovation and management. It contributes to the literature in several ways. First, it provides a global definition, insights and examples of this managerial perspective resulting in a theoretical framework. Second, it explores the relationship between crowdsourcing and technological innovation, the development of social networks and new behaviors of Internet users. Third, it explores different crowdsourcing applications in various sectors such as medicine, tourism, information and communication technology (ICT), and marketing. Fourth, it observes the ways in which crowdsourcing can improve production, finance, management and overall managerial performance. Crowdsourcing, also known as "massive outsourcing" or "voluntary outsourcing," is the act of taking a job or a specific task usually performed by an employee of a company or contractors, and outsourcing it to a large group of people or a community (crowd or mass) via the Internet, through an open call. The term was coined by Jeff Howe in a 2006 issue of Wired magazine. It is being developed in different sciences (i.e., medicine, engineering, ICT, management) and is used in the most successful companies of the modern era (i.e., Apple, Facebook, Inditex, Starbucks). The developments in crowdsourcing has theoretical and practical implications, which will be explored in this book. Including contributions from international academics, scholars and professionals within the field, this book provides a global, multidimensional perspective on crowdsourcing.
