   Sommario/riassunto   This book collects 88 papers on the latest fundamental advances in the state of the art and practice of industrial economics and industrial security theories and practices, providing insights to address problems concerning the national economy, social development and economic security. The book is divided into four main sections: Industrial Economics; Industrial Security; Empirical Studies; and others, all of which cover different aspects, such as industrial organization, industrial structure, industrial development, industrial distribution and industrial policies, as well as theories on industrial security in globalization. It also covers four special sessions: Cultural Industry; National Economy; Finance Groups; and International Economics and Trade. The papers in each section describe state-of-art research works

that are often oriented towards real-world applications and highlight the benefits of related methods and techniques for developing the emerging field of Industrial Economics and Industrial Security.
