

1. Record Nr.	UNINA9910298542503321
Autore	Ganesh K.
Titolo	Design and Development of Knowledge Management for Manufacturing : Framework, Solution and Strategy / / by K. Ganesh, Sanjay Mohapatra, S. Nagarajan
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-02892-8
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (208 p.)
Disciplina	330 338.6 658.5 670
Soggetti	Production management Industrial organization Industrial engineering Production engineering Operations Management Industrial Organization Industrial and Production Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Literature Review -- Readiness Assessment for Knowledge Management Solution Implementation -- Behavior Assessment for Knowledge Management Solutions Implementation -- Taxonomy and Technology Architecture for Knowledge Management Solution Implementation -- Process Design for Knowledge Management Solution Implementation -- Learning Design for Knowledge Management Solution Implementation -- Balance Scorecard Framework for Knowledge Management Solution Implementation -- Vendor Management Framework for Knowledge Management Solution Implementation. Conclusions.
Sommario/riassunto	This book examines the modules/elements required before implementing knowledge management solutions in typical

manufacturing and service industry. The objective is to develop a framework, design and model suitable for all requirements and a strategy to properly implement. Related case studies from organizations are included, with the results provided to use as a solution to problems experienced when implementing knowledge management in the industry. Implementing a knowledge management system can be complex and dynamic, no matter how well planned and developed. Inevitably a degree of organizational inertia is focused on the current state rather than the new. Within an enterprise, personal and group involvement and interests process status and technology landscape can deflect the commitment needed to successfully implement such a system. Cumulative evidence from past research in knowledge management suggests that effective implementation of KM solution in any organization requires a robust designs and models for various critical elements of process, people and technology. Using the techniques provided in this book, readers should be able to design knowledge management strategies, to align objectives of the KM initiatives with their business goals.
