Nota di bibliografia	Includes bibliographic references and index.
Nota di contenuto	Chapter1. Introduction -- Chapter 2. Literature Review -- Chapter 3. Conceptual Framework for Investment Appraisal and Capital Markets Research in Accounting and Methodology -- Chapter 4. Discounted Cash flow for TOM.com -- Chapter 5. Optimisation Model for World Airways -- Chapter 6. Discussion and Implications -- Chapter 7. Summary, Findings and Conclusion. .
Sommario/riassunto	The primary contribution of this book is to integrate the important disciplines which simultaneously impact the investment appraisal process. The book presents a study that develops a new approach to investment appraisal which uses a multiple objective linear programming (MOLP) model to integrate the selected disciplines which include capital markets, corporate governance and capital budgeting. The research covers two case studies, one in the e-commerce sector and another in the airline industry in which the above disciplines are integrated. Readers from the areas of corporate governance, regulation, and accounting would find the survey of different approaches and the new integrated optimization approach particularly useful.
