Nota di contenuto	Introduction -- The Climate Change Negotiations - The Value of

Context and Modeled Experience -- Understanding the Conflictual Relations in the Global Climate Talks -- Strategic Facilitation of Global Climate Negotiations - Opportunities and Intervention -- Conclusion.

Sommario/riassunto

This book provides theoretical and practical insights for effective decision making in situations that involve various types of conflict cleavages. Embedding historical analysis, negotiation analysis, political scientific analysis and game theoretical analysis in an integrated analytical framework allows a comprehensive perspective on various dilemmas and self-enforcing dynamics that inhibit decision making. The conceptualization of strategic facilitation highlights the value of leadership, chairmanship and the role of threshold states in facilitating decision making as the global climate change negotiations unfolds.
