Sommario/riassunto	This book explores the diversity of topics, views and perspectives focused on the relationship between information systems, organizations and managerial control. It brings together theories and practices by a diverse group of scholars working in different

disciplines: organization, management, accounting, information systems development, human-computer interaction. The volume is divided into three sections, each one focusing on a specific theme: organizational change, innovation and information and communication technologies; organizational control, accounting and information systems; information, knowledge and project management practices. The book is based on a selection of the best research papers - original double blind peer reviewed contributions - of the annual conference of the Italian chapter of AIS, held in Milan, Italy in December 2013.
