

1. Record Nr.	UNINA9910298593303321
Autore	Barman Anjan
Titolo	Spin Dynamics and Damping in Ferromagnetic Thin Films and Nanostructures // by Anjan Barman, Jaivardhan Sinha
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-66296-1
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XI, 156 p. 53 illus., 35 illus. in color.)
Disciplina	620.44
Soggetti	Materials—Surfaces Thin films Magnetism Magnetic materials Spectroscopy Microscopy Engineering—Materials Optics Electrodynamics Surfaces and Interfaces, Thin Films Magnetism, Magnetic Materials Spectroscopy and Microscopy Materials Engineering Classical Electrodynamics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Sommario/riassunto	This book provides a comprehensive overview of the latest developments in the field of spin dynamics and magnetic damping. It discusses the various ways to tune damping, specifically, dynamic and static control in a ferromagnetic layer/heavy metal layer. In addition, it addresses all optical detection techniques for the investigation of modulation of damping, for example, the time-resolved magneto-optical Kerr effect technique.
