

1. Record Nr.	UNINA9910298609903321
Titolo	Supramolecular Polymer Networks and Gels / / edited by Sebastian Seiffert
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-15404-4
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (VII, 288 p. 124 illus., 99 illus. in color.)
Collana	Advances in Polymer Science, , 0065-3195 ; ; 268
Disciplina	547.7
Soggetti	Polymers Materials—Surfaces Thin films Amorphous substances Complex fluids Materials science Polymer Sciences Surfaces and Interfaces, Thin Films Soft and Granular Matter, Complex Fluids and Microfluidics Characterization and Evaluation of Materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes Index.
Sommario/riassunto	The series Advances in Polymer Science presents critical reviews of the present and future trends in polymer and biopolymer science. It covers all areas of research in polymer and biopolymer science including chemistry, physical chemistry, physics, material science. The thematic volumes are addressed to scientists, whether at universities or in industry, who wish to keep abreast of the important advances in the covered topics. Advances in Polymer Science enjoys a longstanding tradition and good reputation in its community. Each volume is dedicated to a current topic, and each review critically surveys one aspect of that topic, to place it within the context of the volume. The volumes typically summarize the significant developments of the last 5

to 10 years and discuss them critically, presenting selected examples, explaining and illustrating the important principles, and bringing together many important references of primary literature. On that basis, future research directions in the area can be discussed. Advances in Polymer Science volumes thus are important references for every polymer scientist, as well as for other scientists interested in polymer science - as an introduction to a neighboring field, or as a compilation of detailed information for the specialist. Review articles for the individual volumes are invited by the volume editors. Single contributions can be specially commissioned. Readership: Polymer scientists, or scientists in related fields interested in polymer and biopolymer science, at universities or in industry, graduate students.
