1.	Record Nr.	UNINA9910298615903321
	Autore	P. Dicks Andrew
	Titolo	Green Chemistry Metrics : A Guide to Determining and Evaluating Process Greenness / / by Andrew P. Dicks, Andrei Hent
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
	ISBN	3-319-10500-0
	Edizione	[1st ed. 2015.]
	Descrizione fisica	1 online resource (95 p.)
	Collana	SpringerBriefs in Green Chemistry for Sustainability, , 2212-9898
	Disciplina	546.34
	Soggetti	Chemical engineering Science education Organic chemistry Industrial Chemistry/Chemical Engineering Science Education Organic Chemistry
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references.
	Nota di contenuto	Green Chemistry and Associated Metrics -- Atom Economy and Reaction Mass Efficiency -- The E Factor and Process Mass Intensity -- Selected Qualitative Green Metrics -- An Introduction to Life Cycle Assessment.
	Sommario/riassunto	This contribution to SpringerBriefs in Green Chemistry outlines and discusses the four major green chemistry metrics (atom economy, reaction mass efficiency, E factor and process mass intensity), at a level that is comprehensible by upper-level undergraduates. Such students have previously received fundamental training in organic chemistry basics, and are ideally positioned to learn about green chemistry principles, of which metrics is one foundational pillar. Following this, other green metrics in common use are discussed, along with applications that allow important calculations to be easily undertaken. Finally, an introduction to metrics in the context of life cycle analyses is presented. It should be noted that no other available publication teaches green chemistry metrics in detail with an emphasis on educating undergraduates, whilst simultaneously providing a
