

1. Record Nr.	UNINA9910298621503321
Titolo	Chemokines : Chemokines and Their Receptors in Drug Discovery // edited by Nuska Tschammer
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-14060-4
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (248 p.)
Collana	Topics in Medicinal Chemistry, , 1862-2461 ; ; 14
Disciplina	616.079
Soggetti	Pharmaceutical chemistry Proteins Pharmaceutical technology Medicinal Chemistry Receptors Pharmaceutical Sciences/Technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Introduction -- Insights in the chemokine receptor structures and drug design approaches in chemokine receptors -- Therapeutic targeting of CXCR3 chemokine receptor by small molecules -- Allosteric modulation of chemokine receptors -- Chemokines and their receptors in CNS -- Chemokine receptors in allergy and inflammation.
Sommario/riassunto	Medicinal chemistry is both science and art. The science of medicinal chemistry offers mankind one of its best hopes for improving the quality of life. The art of medicinal chemistry continues to challenge its practitioners with the need for both intuition and experience to discover new drugs. Hence sharing the experience of drug research is uniquely beneficial to the field of medicinal chemistry. Drug research requires interdisciplinary team-work at the interface between chemistry, biology and medicine. Therefore, the topic-related series Topics in Medicinal Chemistry covers all relevant aspects of drug research, e.g. pathobiochemistry of diseases, identification and validation of (emerging) drug targets, structural biology, drugability of

targets, drug design approaches, chemogenomics, synthetic chemistry including combinatorial methods, bioorganic chemistry, natural compounds, high-throughput screening, pharmacological in vitro and in vivo investigations, drug-receptor interactions on the molecular level, structure-activity relationships, drug absorption, distribution, metabolism, elimination, toxicology and pharmacogenomics. In general, special volumes are edited by well known guest editors.
