

1. Record Nr.	UNINA9910298630103321
Autore	Weidenbörner Martin
Titolo	Natural Mycotoxin Contamination in Humans and Animals // by Martin Weidenbörner
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-16039-7
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (388 p.)
Disciplina	54 571.1 615 641.3 664
Soggetti	Food—Biotechnology Physiology Pharmacology Food Science Animal Physiology Pharmacology/Toxicology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Humans -- Animals -- Literature.
Sommario/riassunto	This book presents a review of the existing literature on natural mycotoxins to create a comprehensive reference for mycotoxin levels. Each entry includes contamination, concentration rate, mostly mean mycotoxin concentration of organs (human and animal), and country of origin of the sample. Due to the serious spoilage and health issues the presence of mycotoxins can cause, it is imperative that corresponding scientists, health institutions, and the food and feed industries have a more qualified understanding of mycotoxins in living things. To this end, Natural Mycotoxin Contamination in Humans and Animals provides an excellent resource. The present book complements the series of the author's previous books, Mycotoxins in

Feedstuffs and Mycotoxins in Foodstuffs, in that it is a review of the literature to create a comprehensive reference for mycotoxin levels. As with Mycotoxins and their Metabolites in Humans and Animals, the focus remains the same, but the scope now covers natural mycotoxins only.
