1. Record Nr. UNINA9910793398803321

Autore	Harvey Ramon
Titolo	The Qur'an and the just society / / Ramon Harvey
Pubbl/distr/stampa	Edinburgh : , : Edinburgh University Press, , [2018] ©2018
ISBN	1-4744-1720-5 1-4744-1719-1
Descrizione fisica	1 online resource (x, 276 pages) : illustrations
Disciplina	297.5
Soggetti	Social justice - Religious aspects - Islam
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (pages 231-256) and indexes.
Nota di contenuto	Intro -- Foreword by M. A. S. Abdel Haleem -- Preface -- Acknowledgements -- Introduction -- Part I Qur'anic Ethics -- 1 Moral Narrative -- 2 Theology and Ethics -- 3 Hermeneutics -- 4 Historical Context -- Part II Political Justice -- 5 Politics -- 6 Peace -- 7 War -- Part III Distributive Justice -- 8 Trade -- 9 Alms -- 10 Marriage -- 11 Inheritance -- Part IV Corrective Justice -- 12 Public Crimes -- 13 Private Crimes -- Conclusion -- Notes -- Glossary of Arabic Terminology -- Bibliography -- Index of Qur'anic Verses -- Index of Biblical Verses -- General Index.
Sommario/riassunto	Utilising a pioneering theological and hermeneutic framework adapted from both classical Muslim literature and contemporary academic studies of the Qur'an, Ramon Harvey explores the underlying principles of its system of social justice.

2. Record Nr. UNINA9910298646503321

Titolo	Gold Clusters, Colloids and Nanoparticles I / / edited by D. Michael P. Mingos
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-07848-8
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (IX, 282 p. 137 illus., 90 illus. in color.) : online resource
Collana	Structure and Bonding, , 0081-5993 ; ; 161
Disciplina	546
Soggetti	Chemistry, Inorganic Nanochemistry Chemistry, Physical and theoretical Inorganic Chemistry Theoretical and Computational Chemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	A historical introduction -- Theoretical studies on gold clusters and nanoparticles -- Gold Nanoclusters: Size-Controlled Synthesis and Crystal Structures -- Progress in the Synthesis and Characterization of Gold Nanoclusters -- Structural aspects of phosphine-coordinated ultrasmall gold clusters: the next generation -- Structure & Bonding in the Metal-Rich Gold-Thiolate Cluster Compounds -- Gold nano-alloys -- Model catalysts based on Au clusters and nano particles -- Gold clusters in the gas phase -- Gas phase formation, structure and reactivity of gold cluster ions.
Sommario/riassunto	The series Structure and Bonding publishes critical reviews on topics of research concerned with chemical structure and bonding. The scope of the series spans the entire Periodic Table and addresses structure and bonding issues associated with all of the elements. It also focuses attention on new and developing areas of modern structural and theoretical chemistry such as nanostructures, molecular electronics, designed molecular solids, surfaces, metal clusters and supramolecular structures. Physical and spectroscopic techniques used to determine, examine and model structures fall within the purview of Structure and

Bonding to the extent that the focus is on the scientific results obtained and not on specialist information concerning the techniques themselves. Issues associated with the development of bonding models and generalizations that illuminate the reactivity pathways and rates of chemical processes are also relevant. The individual volumes in the series are thematic. The goal of each volume is to give the reader, whether at a university or in industry, a comprehensive overview of an area where new insights are emerging that are of interest to a larger scientific audience. Thus each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole. The most significant developments of the last 5 to 10 years should be presented using selected examples to illustrate the principles discussed. A description of the physical basis of the experimental techniques that have been used to provide the primary data may also be appropriate, if it has not been covered in detail elsewhere. The coverage need not be exhaustive in data, but should rather be conceptual, concentrating on the new principles being developed that will allow the reader, who is not a specialist in the area covered, to understand the data presented. Discussion of possible future research directions in the area is welcomed. Review articles for the individual volumes are invited by the volume editors. Readership: research scientists at universities or in industry, graduate students Special offer For all customers who have a standing order to the print version of Structure and Bonding, we offer free access to the electronic volumes of the Series published in the current year via SpringerLink.
