

1. Record Nr.	UNINA9910298963903321
Titolo	Advances in Computer Science and Ubiquitous Computing : CSA & CUTE // edited by Doo-Soon Park, Han-Chieh Chao, Young-Sik Jeong, James J. (Jong Hyuk) Park
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2015
ISBN	981-10-0281-9
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (883 p.)
Collana	Lecture Notes in Electrical Engineering, , 1876-1100 ; ; 373
Disciplina	004
Soggetti	Computer communication systems Electrical engineering Data mining Computational intelligence Computer security Computer Communication Networks Communications Engineering, Networks Data Mining and Knowledge Discovery Computational Intelligence Systems and Data Security
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"International Conference on Computer Science and its Applications (CSA 2015) is the 7th event of the series of international scientific conference."
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	I CSA -- 1 Mobile and ubiquitous computing -- 2 Dependable, reliable and autonomic computing -- 3 Security and trust management -- 4 Multimedia systems and services -- 5 Networking and communications -- 6 Database and data mining - 7 Game and software engineering -- 8 Grid and scalable computing -- 9 Embedded system and software -- 10 Artificial intelligence -- 11 Distributed and parallel algorithms -- 12 Web and internet computing -- 13 IT policy and business management -- II CUTE -- 1 Ubiquitous Communication and Networking -- 2 Ubiquitous Software Technology -- 3 Ubiquitous Systems and Applications -- 4 Ubiquitous Security, Privacy and Trust -- 5 IT

This book presents the combined proceedings of the 7th International Conference on Computer Science and its Applications (CSA-15) and the International Conference on Ubiquitous Information Technologies and Applications (CUTE 2015), both held in Cebu, Philippines, December 15 - 17, 2015. The aim of these two meetings was to promote discussion and interaction among academics, researchers and professionals in the field of computer science covering topics including mobile computing, security and trust management, multimedia systems and devices, networks and communications, databases and data mining, and ubiquitous computing technologies such as ubiquitous communication and networking, ubiquitous software technology, ubiquitous systems and applications, security and privacy. These proceedings reflect the state-of-the-art in the development of computational methods, numerical simulations, error and uncertainty analysis and novel applications of new processing techniques in engineering, science, and other disciplines related to computer science.
