

1. Record Nr.	UNINA9910298964903321
Titolo	Model-Driven Engineering and Software Development : Third International Conference, MODELSWARD 2015, Angers, France, February 9-11, 2015, Revised Selected Papers // edited by Philippe Desfray, Joaquim Filipe, Slimane Hammoudi, Luís Ferreira Pires
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-27869-X
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (XV, 438 p. 237 illus. in color.)
Collana	Communications in Computer and Information Science, , 1865-0929 ; ; 580
Disciplina	005.1
Soggetti	Software engineering Computer simulation Software Engineering Simulation and Modeling
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Intro -- Preface -- Organization -- Contents -- Invited Paper -- Safety Case Development with SBVR-Based Controlled Language -- 1 Introduction -- 2 Background -- 2.1 Goal Structuring Notation -- 2.2 Semantics of Business Vocabulary and Rules -- 3 Methodology -- 3.1 Conceptual Phase: From Conceptual Model to SBVR Model -- 3.2 Vocabulary Phase: Creating Vocabulary with an SBVR Editor -- 3.3 Modeling Phase: Construct Safety Cases with Vocabulary -- 4 Case Study -- 5 Related Work -- 6 Conclusions and Future Work -- References -- Modeling Languages, Tools and Architectures -- Realizing a Conceptual Framework to Integrate Model-Driven Engineering, Software Product Line Engineering, and Software Configuration Management -- 1 Introduction -- 2 The Conceptual Framework -- 2.1 Overview -- 2.2 Version Space -- 2.3 Product Space -- 3 Model-Driven Realization -- 3.1 Metamodels for the Repository -- 3.2 Workspace and Local Synchronization -- 3.3 Realization of Check-Out and Commit -- 4 Optimization -- 4.1 Hierarchical Evaluation of Visibilities -- 4.2 Visibility Forests -- 4.3 Substitution of Ambition

Expressions -- 5 Related Work -- 6 Conclusion -- References --
Composition of Heterogeneous Modeling Languages -- 1 Introduction
-- 2 Motivation -- 2.1 Software Architecture -- 2.2 Domain and Data
Modeling -- 3 Language Integration Concepts -- 3.1 Language
Aggregation -- 3.2 Language Embedding -- 3.3 Language Inheritance
-- 3.4 Context Conditions -- 4 Language Integration Framework -- 4.1
Symbol Table Concepts -- 4.2 Symbol Table Components -- 4.3
Configuration of Language Compositions -- 5 Related Work -- 6
Conclusion -- References -- A Model-driven Approach for the
Generation of Customizable Model Migrations -- 1 Introduction -- 2
Motivation -- 3 Formal Framework for Adaptable Model Migrations --
3.1 Migration Specification Foundations.
3.2 Migration Specification Implementation -- 4 Experiment -- 5
Current and Related Works -- 6 Conclusion and Future Works --
References -- Parallel Application Development Using Architecture View
Driven Model Transformations -- Abstract -- 1 Introduction -- 2
Preliminaries -- 2.1 Modeling Parallel Applications -- 2.2 Architecture
Viewpoints for Modeling Parallel Applications -- 3 Architecture View
Driven Transformations -- 3.1 Algorithm Decomposition Generator --
3.2 Component Generator -- 3.3 Deployment Generator -- 3.4 Logical
Configuration Generator -- 4 Implementation and Toolset -- 5 Related
Work -- 6 Conclusion -- References -- Runtime Translation of Model-
Level Queries to Persistence-Level -- 1 Introduction -- 2 MQT:
Overview -- 2.1 Data-schema -- 2.2 Conceptual Model -- 3 MQT: EOL
to SQL Translation -- 3.1 Query Model Elements -- 3.2 Element
Filtering -- 3.3 Query Results (EDBObjectList) -- 3.4 Query Results
(EDBObject) -- 4 Empirical Study -- 4.1 Results -- 5 Related Work -- 6
Conclusions and Further Work -- References -- Integration of
Handwritten and Generated Object-Oriented Code -- 1 Introduction --
2 Evaluation Criteria -- 3 Integration Mechanisms Based on Language
Concepts -- 3.1 Generation Gap -- 3.2 Extended Generation Gap --
3.3 Delegation -- 3.4 Include Mechanism -- 3.5 Partial Classes -- 3.6
Aspect-Oriented Programming -- 4 General Integration Mechanisms --
4.1 PartMerger Mechanism -- 4.2 Protected Regions -- 5 Discussion --
6 Related Work -- 7 Extend Generated Code with Action Languages --
8 Conclusion -- References -- A Framework for Metamodel
Composition and Adaptation with Conformance-Preserving Model
Migration -- 1 Introduction -- 2 Motivating Example -- 3 Metamodel
Adaptations -- 3.1 The Analysis Environment -- 3.2 The Adaptation
Rules -- 3.3 Example Revisited -- 4 Conformance -- 4.1 Example
Revisited -- 5 Related Work.
6 Conclusion and Future Work -- References -- A Textual Domain-
Specific Language Based on the UML Testing Profile -- 1 Introduction
-- 2 Related Work -- 3 Test Specification Language -- Ubt1 -- 3.1
General -- 3.2 Applications -- 3.3 Software Architecture -- 3.4
Language Elements -- 4 Use Case -- 4.1 Context of the Use Case --
4.2 System Under Test -- 4.3 Specifying Test Case -- 4.4
Transformation to Matlab Code -- 4.5 Resulting Matlab Script -- 5
Conclusion -- References -- Metamodel and Model Composition by
Integration of Operational Semantics -- 1 Introduction -- 2 Definitions
-- 3 Example -- 4 The Framework -- 4.1 Specification of Unification
Model -- 4.2 Definition of Code Generators -- 4.3 Code Generation --
4.4 Specification of Linking Model -- 4.5 Execution of Models -- 5
Evaluation -- 6 Related Work -- 7 Conclusion and Future Work --
References -- Computability Assurance for UML Template Binding --
Abstract -- 1 Introduction -- 2 An Introduction to UML Templates -- 3
Some Limitations of UML Templates -- 4 Functional Conformance --
4.1 Type Conformance -- 4.2 Multiplicity Conformance -- 4.3 Contents

Conformance -- 4.4 Staticity Conformance -- 4.5 Visibility Requirement -- 4.6 Computability Assurance -- 5 Related Work -- 6 Conclusions and Future Work -- 1 Appendix: OCL Formulation of Functional Conformance -- References -- Challenging a Transformation-Wise Architecture Framework in a Comparative Case Study -- 1 Introduction -- 2 Related Work and Motivation -- 3 Design Method in Short -- 3.1 Requirement Listing -- 3.2 Architecture Description and Transformations -- 3.3 A Transformational Approach -- 4 Case Study Protocol -- 4.1 Participants' Profiles -- 4.2 Initial Phase to Build Comparable Groups -- 4.3 Case Study Startup -- 4.4 Case Description -- 4.5 Evaluation Method -- 5 Case Study Results. 5.1 Functional Correctness and Quality of Deliverables -- 5.2 Paper-Based Survey -- 6 Discussion -- 6.1 Evaluation of the Approach -- 6.2 Threats to Validity -- 7 Conclusions -- References -- Meta Model Extensibility of BPMN: Current Limitations and Proposed Improvements -- 1 Introduction -- 2 Fundamentals -- 2.1 Extensibility of Conceptual Modeling Languages -- 2.2 Excursus: Extensibility of Programming Languages -- 3 BPMN Extensibility -- 3.1 Implicit Capabilities -- 3.2 Explicit Capabilities -- 3.3 Problematic Aspects of Extending the BPMN Meta Model -- 4 Profiling -- 4.1 Modus Operandi -- 4.2 Modeling Concepts -- 4.3 Application and Example -- 5 Under Specification (Hooking) -- 5.1 Modus Operandi -- 5.2 Modeling Concepts -- 5.3 Application and Example -- 6 Annotation (Plug-ins and Add-Ons) -- 6.1 Modus Operandi of Plug-Ins -- 6.2 Modus Operandi of Add-Ons -- 6.3 Modeling Concepts -- 6.4 Application and Example for Plug-Ins -- 6.5 Application and Example for Add-Ons -- 7 Comparison and Conclusion -- 7.1 Comparison of Extension Approaches -- 7.2 Conclusion and Further Research -- References -- An Approach to Define and Apply Collaboration Process Patterns for Software Development -- Abstract -- 1 Introduction -- 2 Modelling Collaborative Processes -- 2.1 Software Process Modelling -- 2.2 Collaboration in Software Process Modeling -- 2.3 Workflow Patterns -- 3 An Approach to Collaboration Patterns -- 3.1 Introduction -- 3.2 Pattern "Duplicate in Sequence with Multiple Actors" (DSMA) -- 3.3 Pattern "Duplicate in Parallel with Multiple Actors and Merge" (DPMAM) -- 3.4 Conclusion -- 4 Application of Collaboration Patterns -- 5 Realization and Case Study -- 5.1 Case Study -- 5.2 Supporting Tool Prototype -- 6 Conclusion -- References -- An Ontology-Based Process Editor for Generating Model Mapping in Tool Integration -- Abstract -- 1 Introduction. 2 Illustrating Example -- 3 iSPEM -- A Multilevels Process Modeling Language -- 3.1 SPEM 2.0 -- 3.2 Multi-level Process Elements -- 4 Combining Process Editor and Ontology -- 4.1 Reusable Process Ontology -- 4.2 Generation of Transformation Rules for a Tool Integration Point -- 5 iSPEM Process Editor -- 5.1 Implementation of iSPEM System -- 5.2 Case-Study -- 6 Conclusions -- References -- Using Model Driven Engineering to Support Multi-paradigms Security Analysis -- Abstract -- 1 Introduction -- 2 Background -- 2.1 EBIOS Method -- 2.2 Attack Tree Quantitative Method -- 2.3 Motivation -- 3 Model Driven Approach -- 3.1 Process Description -- 3.2 Model-Based Security Framework Description -- 4 Cyber-Power System Case Study -- 5 Related Work -- 6 Conclusion, Perspectives -- References -- Designing Safe and Secure Embedded and Cyber-Physical Systems with SysML-Sec -- 1 Introduction -- 2 Impact of Attacks -- 3 The Fundamental Role of the System Architecture for Security -- 3.1 Software/Hardware Partitioning -- 3.2 Model-Driven Engineering -- 4 Specifying the Security Requirements -- 4.1 Security Goals and Threats -- 4.2 SysML-Sec: A SysML-Based Model-Oriented Approach -- 4.3

Methodology -- 4.4 Toolkit -- 5 Safety- and Security-Oriented Validations -- 5.1 Safety Properties -- 5.2 Security Properties -- 5.3 Safety and Security, Safety vs. Security -- 6 Example: Safety and Security Analysis of a Communicating Vehicle -- 6.1 Security Requirements -- 6.2 Threats and Attacks -- 6.3 Hardware/Software Partitioning -- 7 Conclusion and Future Work -- References -- Methodologies, Processes and Platforms -- Architecture Optimization with SysML Modeling: A Case Study Using Variability -- Abstract -- 1 Introduction -- 2 Methodology -- 2.1 Design Flow with MBSE -- 2.2 Our Proposal -- 3 SysML Modeling for Optimization -- 3.1 Case Study -- 3.2 Requirements Capture. 3.3 MDO Context and Objective Functions Definition.

Sommario/riassunto

This book constitutes thoroughly revised and selected papers from the Third International Conference on Model-Driven Engineering and Software Development, MODELSWARD 2015, held in Angers, France, in February 2015. The 25 thoroughly revised and extended papers presented in this volume were carefully reviewed and selected from 94 submissions. They are organized in topical sections named: invited papers; modeling languages, tools and architectures; methodologies, processes and platforms; applications and software development.
