   ISBN   3-319-26925-9

   Edizione   [1st ed. 2015.]

   Descrizione fisica   1 online resource (XI, 294 p. : ill

   Collana   Lecture Notes of the Institute for Computer Sciences, Social Informatics
                         and Telecommunications Engineering, , 1867-822X ; ; 158

   Disciplina   004

   Soggetti   Computer networks
                         Application software
                         Electronic digital computers - Evaluation
                         Computer Communication Networks
                         Computer and Information Systems Applications
                         System Performance and Evaluation

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Nota di contenuto   Cellular Network Management and Self-Organizing Networks --
                         Techniques and Algorithms for Wireless Networks -- Applications and
                         Services -- Wireless Sensor Networks and IoT Architecures.

   Sommario/riassunto   This book constitutes the post-proceedings of the 7th International
                         Conference on Mobile Networks and Management, MONAMI 2015, held
                         in Santander, Spain, in September 2015. The 16 full papers were
                         carefully reviewed and selected from 24 submissions. In addition there
                         appears one short and 5 invited papers. These are organized
                         thematically in five parts starting with Cellular Network Management
                         and Self-Organizing Networks in Part I. Radio Resource Management in
                         LTE and 5G Networks aspects are discussed in Part II. Part III presents
                         novel Techniques and Algorithms for Wireless Networks, while Part IV
                         deals with Video Streaming over Wireless Networks. Part V
                         includespapers presenting avant-garde research on applications and

services and, finally, Part VI features two papers introducing novel architectural approaches for Wireless Sensor Networks.
