

1. Record Nr.	UNINA9910298972503321
Autore	Harvey Michael G
Titolo	Wireless Next Generation Networks : A Virtue-Based Trust Model // by Michael G. Harvey
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-11903-6
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (130 p.)
Collana	SpringerBriefs in Electrical and Computer Engineering, , 2191-8112
Disciplina	004 004.6 005.437 006.3 4019 621.382
Soggetti	Computer networks Electrical engineering User interfaces (Computer systems) Artificial intelligence Computer Communication Networks Communications Engineering, Networks User Interfaces and Human Computer Interaction Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction: Motivations for a New Trust Model -- Wireless Threats and Key Management Issues -- Trust, Epistemic Normativity, and Rationality -- Challenges to Virtue Perspectivism -- Other Theories of Trust and Trust Models -- A Normative Virtue-Based Trust Model -- Conclusion: Modeling Human Social Interaction.
Sommario/riassunto	This SpringerBrief proposes a trust model motivated by virtue epistemology, addressing the need for a more efficient and flexible trust model for wireless next generation networks. This theory of trust simplifies the computation and communication overhead of strictly

cognitive-computational models of trust. Both the advantages and the challenges of virtue-based trust models are discussed. This brief offers new research and a general theory of rationality that enables users to interpret trust and reason as complementary mechanisms that guide our rational conduct at two different epistemic levels. The presented model of human social interaction is designed for the highly dynamic and unstructured environment of the mobile Internet and wireless next generation networks. *Wireless Next Generation Networks: A Virtue-Based Trust Model* targets network engineers, cognitive scientists, AI researchers, philosophers, and social scientists. Advanced-level students studying computer science, electrical engineering and social science will also find the interdisciplinary perspective useful.
