

1. Record Nr.	UNINA9910299053403321
Titolo	Advances in Enterprise Engineering VIII [[electronic resource]] : 4th Enterprise Engineering Working Conference, EEWC 2014, Funchal, Madeira Island, Portugal, May 5-8, 2014, Proceedings // edited by David Aveiro, José Tribolet, Duarte Gouveia
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2014
ISBN	3-319-06505-X
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (XVI, 197 p. 61 illus.)
Collana	Lecture Notes in Business Information Processing, , 1865-1348 ; ; 174
Disciplina	620.7
Soggetti	Information technology Business—Data processing Application software IT in Business Information Systems Applications (incl. Internet) Computer Appl. in Administrative Data Processing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	The Nature of the Enterprise Engineering Discipline -- What Does DEMO Do? A Qualitative Analysis about DEMO in Practice: Founders, Modellers and Beneficiaries -- A Pension System Redesign Case - Limitations and Improvements on DEMO -- A New Action Rule Syntax for Demo Models Based Automatic workflow process generation (DEMOBAKER) -- Detailed Analysis of REA Ontology -- Evaluating Accounting Information Systems That Support Multiple GAAP Reporting Using Normalized Systems Theory -- Modeling Financial Statement Preparation of a SME Enterprise by an Accountancy Firm -- Linking Value Chains – Combining e3Value and DEMO for Specifying Value Networks -- ECO-FOOTPRINT: An Innovation in Enterprise System Customization Processing -- Automatic Model Transformation for Enterprise Simulation -- Introducing a Framework for Scalable Dynamic Process Discovery- From Business Process Models to Use Case Models: A Systematic Approach -- Approach for Semi-automatic Extraction of

Sommario/riassunto

This book constitutes the proceedings of the 4th Enterprise Engineering Working Conference (EEWC), held in Funchal, Madeira Island, Portugal, during May 5-8, 2014. EEWC aims at addressing the challenges that modern and complex enterprises are facing in a rapidly changing world. The participants of the working conference share a belief that dealing with these challenges requires rigorous and scientific solutions, focusing on the design and engineering of enterprises. The goal of EEWC is to stimulate interaction between the different stakeholders, scientists, as well as practitioners, interested in making enterprise engineering a reality. The 13 papers presented were carefully reviewed and selected for inclusion in the book. EEWC 2014 had 42 submissions and accepted 13 for publication. The topics of the presented papers allowed for active participation in interesting discussions and exchange of ideas and stimulated future cooperation among the participants. This made EEWC a real “working conference” contributing to the further development of enterprise engineering as a mature discipline. Topics covered include: enterprise engineering in general, the DEMO methodology, the REA ontology, financial applications, business processes management, and enterprise simulation.
