1. Record Nr.   UNINA9910299162803321

   Titolo   Future Access Enablers for Ubiquitous and Intelligent Infrastructures : Third International Conference, FABULOUS 2017, Bucharest, Romania, October 12-14, 2017, Proceedings / / edited by Octavian Fratu, Nicolae Militaru, Simona Halunga

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018

   ISBN   3-319-92213-0

   Edizione   [1st ed. 2018.]

   Descrizione fisica   1 online resource (XIV, 262 p. 128 illus.)

   Collana   Lecture Notes of the Institute for Computer Sciences, Social Informatics and Telecommunications Engineering, , 1867-8211 ; ; 241

   Disciplina   004

   Soggetti   Computer communication systems
                        Application software
                        Artificial intelligence
                        Special purpose computers
                        Computer security
                        Optical data processing
                        Computer Communication Networks
                        Information Systems Applications (incl. Internet)
                        Artificial Intelligence
                        Special Purpose and Application-Based Systems
                        Systems and Data Security
                        Image Processing and Computer Vision

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Includes index.

   Nota di contenuto   future access networks -- Internet of Things -- smart city/smart environment applications -- communications and computing infrastructures -- security aspects in communication and data processing -- signal processing and multimedia.

   Sommario/riassunto   This book constitutes the refereed post-conference proceedings of the Third International Conference on Future Access Enablers for Ubiquitous and Intelligent Infrastructures, FABULOUS 2017, held in

Bucharest, Romania, in October 2017. The 37 revised full papers were carefully reviewed and selected from 61 submissions. The main topics deal with future access networks, Internet of Things and smart city/smart environment applications, communications and computing infrastructures, security aspects in communication and data processing, signal processing and multimedia.
